

ATUM – LMS

LEARNING MANAGEMENT SYSTEM

➤ **What is ATUM-LMS?**

ATUM-LMS is a sophisticated state-of-art learning management tool which fulfils the learning and training management needs of corporates by hosting a diverse set of domain specific courses, engaging learners and assessing them to improve the performance. It is the much-needed solution for those who want to shift from classroom training to online training.

➤ **Why should you care?**

Corporate managers in HR and L&D departments are the intermediaries who are responsible for the employee performance either it is a fresher or an experienced employee. Handling trainings offline and identifying the top performers by manually evaluating the tests conducted is a tedious and energy draining procedure which has to be done as a part of the job. As a problem solver, ATUM learning management system can be the one-stop solution to manage large team trainings and focus on multiple other tasks effectively.

➤ **Who does it serve?**

L&D Function + Corporates

➤ **How can ATUM-LMS help you with Learning and Training needs?**

Listed down below are some of the features that ATUM – Learning management system comprises which can directly improve the *employee performance* as well as *employee performance management*:

Feature	Description
Easy-to-use Dashboards	Provide graphical and tabular reports on a dashboard to top management to show competency building.
Cloud-Hosting and Scalability	The utilization of cloud services has become common with the advancement in cloud computing. Handling large user base for assigning trainings and carrying out assessments is easier with the aid of cloud services.
Polyglot	Access the entire management system in multiple international languages
Content authoring	Develop content within the management system whenever a quick course is to be assigned to the user base. The learning content made would be on par with the external e-Learning created with advanced content digitization tools.
Training Management	Get role-based Access, user management, attendance management and schedule classroom training along with uploading relevant notes corresponding to the training. Manage notifications via email/SMS and receive feedback of the training conducted through chat or email. Share the calendar with the trainer as well as trainees.
Assessment and Certification	Create a variety of type of questions and randomize them within the assessment. Multiple-level certifications are awarded based on the courses completed and assessments cleared.

Gamification	Upload gamified content which plays a great role in engaging the learners and henceforth helping them perform well after quick learning.
